Sir:

AMENDMENT

In response to the Office Action dated January 13, 2003, please amend the above-captioned Reissue Patent Application as follows:

In the Specification:

Please substitute the following four paragraphs for the four paragraphs that were entered in the previous Amendment in place of the four paragraphs in Column 4 of the original Specification (which is the same as Column 4 of U.S. Patent 6,038,784):

Bi
Mounting structure 20, by ganging adjacent pegs 18 and adjacent [nipple] ring support members 32 together by use of a common axle, thereby imparts lateral stability to the pegs 18 and the [nipple] ring support members 32, further deterring any motion other than about the single axis of rotation 40. Accordingly, the pegs 18 are constrained to move in a predetermined plane of rotation 49.
